

Did you know?

AES Indiana works year-round to prevent existing trees from causing outages or danger to you. We have a comprehensive tree-trimming, line-clearance program that operates on a 48-month cycle. Misplaced or improperly maintained trees often cause power outages and can be dangerous when branches come in contact with power lines. During these routine trim cycles, AES Indiana crews will haul away the debris at no cost to our customers.

Please be aware that AES Indiana is not responsible for the removal of limbs, wood, or debris resulting from storm damage. That is the responsibility of the property owner. Your insurance company may help cover the cost of hiring a clean-up crew.

For more information on our vegetation management programs, visit aesindiana.com/tree-trimming

AES Indiana customers **can be affected** by identity theft and fraud schemes.

Recognize the signs. Unexpected phone calls requesting your account and billing information, threatening phone calls of any matter, and showing up at your home unannounced without ID are some red flags.

Verify. If you receive a call and are unsure the caller is an AES Indiana employee, call us at [317-261-8222](tel:317-261-8222) to verify any questions you have.

Help stop scams. If you believe you've been a victim of a scam or scam attempt, call AES Indiana Customer Service and contact your local law enforcement agency.

If something seems off, it probably is.
