

Get paid to save with CoolCents®

On extremely hot days, demand on the energy grid can become strained, causing the energy reaching your home to be less efficient and more expensive. AES Indiana's CoolCents program helps manage this strain, making the energy provided more affordable by shifting some energy use out of the hours when demand is the highest.

Customers who enroll in the program will **receive up to \$5 in bill credits per month** during peak demand season (June through September) for their participation.

How it works:

- Enroll in the CoolCents program
- Connect your smart thermostat
- Earn seasonal bill credits up to \$20 (June – September)

Who is eligible:

- Must be an AES Indiana residential electric customer
- Have an eligible Wi-Fi enabled smart thermostat
- Have a consistent home Wi-Fi network
- Have central A/C connected to your smart thermostat

Eligible devices:

- ecobee smart thermostats
- Sensi smart thermostats
- Google Nest smart thermostats
- Honeywell smart thermostats

Find your brand of smart thermostat in the list below and visit the corresponding website for information on setup, installation and more. See the back of this flyer if your thermostat is already set up.
