Protecting customers while planning for growth

IURC approves AES Indiana's plan to serve large load growth while protecting affordability

As Central Indiana grows, AES Indiana is required to provide electric service to any customer that chooses to locate within our service territory, whether that customer is a household, a small business, or a data center. Just as importantly, we have a responsibility to ensure that growth is managed in a way that protects the customers who already count on us.

AES Indiana's approved plan to serve Google's proposed data center in Morgan County was designed to support this growth responsibly.

What this partnership means for customers

Google agrees to pay 100% of its costs.

Google will fund the power equipment and energy needed to serve its facility, without passing costs to existing customers.

Protections are in place if plans change.

The partnership includes safeguards designed to help protect customers if Google's energy needs change.

Powering your brightest moments this holiday season

We are proud to sponsor the AES Indiana Yuletide Celebration, a beloved holiday tradition bringing families together to enjoy performances by the Indianapolis Symphony Orchestra. Customers may use the promo code HOLIDAYGLOWAESIN20 for 20% off the following performances:

→ Tuesday, December 15 at 7:30 p.m.
→ Wednesday, December 16 at 7:30 p.m.

AES Indiana quick tip

Beware of utility scams

Be cautious if someone claiming to represent AES Indiana contacts you and:

→ Threatens immediate disconnection.
→ Demands immediate payment with a gift card, cryptocurrency, or payment app.
→ Promises a refund or rebate.
→ Asks for personal information.

Recognize the warning signs and learn how to report a scam at aesindiana.com/utility-scams
