

# Virtual home energy assessments can save you money

A free virtual home energy assessment is the easiest and most convenient way for homeowners to learn how to make their homes as energy efficient as possible.

- Your FREE Virtual Home Energy Assessment includes:
- An assessment of your home's energy efficiency
- A custom list of upgrades to help your home become energy efficient
- Details on AES Indiana rebates for qualified home improvements
- A free smart thermostat, LED light bulbs and other instant savers, if eligible

Visit: [aesindiana.com/virtual-home-energy-assessments](https://aesindiana.com/virtual-home-energy-assessments) to learn more.

Customers who meet income requirements can receive FREE in-home energy assessments and home upgrades that can help decrease your energy bills and increase your comfort.

## AES Indiana **remains committed** to helping customers

The cost to provide reliable service is increasing and is driven by many factors, including the rising market cost of fuel. While we earn no profit on fuel charges, you may see an increase in your monthly bill due to current fuel cost increases. Our priority is to provide you with affordable energy that is reliable and sustainable. We understand that bill increases can be a financial challenge, and we are here to help.

\*AES Indiana's fuel adjustment charge is updated quarterly to reflect current market prices.

Here are some resources to help you **manage your energy costs**.

**Budget Billing** allows customers to pay the same amount for 11 months and then settle the difference on the 12th month.

**Payment Extensions** can be requested online at [AESIndiana.com](https://aesindiana.com) or by calling the automated system at 317.261.8222. Preferred Bill Date is offered for AES Indiana customers who want a due date that best matches their paydays.

We care about our customers and offer **The Power of Change** to help income-qualified customers with a one-time grant to assist with electric bill payments when financial challenges occur. The goal is to offer customers a hand-up during a time of need. Visit [aesindiana.com/power-change](https://aesindiana.com/power-change) for more information.
