

New construction

Custom incentives

Incentive opportunities are building

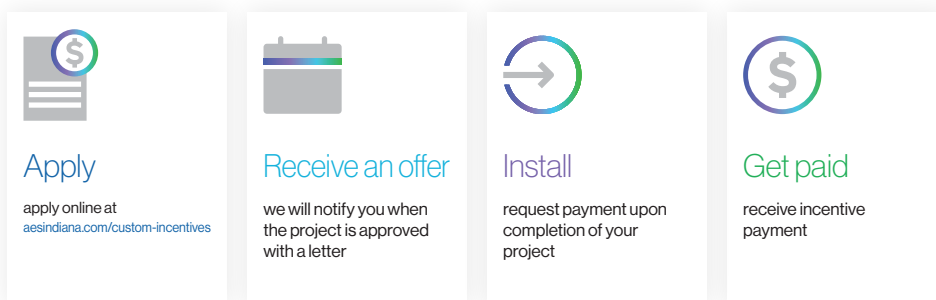

AES Indiana's Custom Incentive program is expanding to include new construction!

Businesses can earn cash back incentives on new construction projects and major renovations that exceed the Indiana minimum building code energy standards. Let our engineers help you develop a strategy to save energy and money. We'll work with you to define your project's energy savings potential to maximize your incentive opportunity.

Financial incentives

Earn up to \$0.10 per kWh saved above energy code as determined by the energy model based on the projected first-year energy savings.

How it works

Energy-saving opportunities

- Building envelope
- Energy recovery
- Data center
- Process equipment
- Compressed air system
- Air rotation unit

For businesses like yours

- Auto industry
- Colleges/Universities
- Healthcare
- Industrial
- Office buildings
- Religious buildings
- Restaurants
- Retail
- Warehouses

Email us today at custom@aesindianarebates.com to review your project's savings potential or call 888-982-7071 to speak with a program representative.

Incentives are capped at 50% of the total project cost and \$1,000,000. Incentives require preapproval and must be in the design phase.
